stood guard over that qualified life energy, holding it and increasing it with every heartbeat until the hour when it should be invited into the world of men. Then a beam from that Cosmic Presence and that aura carries the virtue to whatever focus it is called.

Touch the hem of the garment of the Holy Spirit, you who need comfort. Invite a ray from His Great Cosmic Heart, and let the energies of your world embody the magnificence which He has gathered from the Sun. Long before you call has He answered and builded that comfort for the day when you would require it. Within that comfort are those gifts of forbearance, of fortitude, of humility, reverence and piety. Within that comfort are all those many ramifications of the Divine Nature of Goodness.

Beloved Kuthumi's Report on the Transmission Flame - Part 2

The Beloved Maha Chohan, Himself, presides tonight in the Great Flame Chamber where He is demonstrating to the gathered Brotherhood the activity which engages His energies as He becomes the magnet for all the primal life that is used on the planet Earth. This activity is a most sacred one, and it is seldom that unascended eyes have been privileged to witness a Being drawing such power. However, as every unascended being is also a magnet drawing prinal life, He thought that perhaps if witnessed with the inner sight how life is magnetized, drawn and qualified, it would give to the individuals witnessing His activity a greater realization of the responsibility of drawing this primal life as well as a desire to use it to create something of beauty - something that would be a blessing to the universe or something which would be a spiritual heritage for the rest of mankind, impersonally, as He does.

The Flame Chamber in the heart of the Ceylon Retreat is the focus on the Earth through which our Beloved Maha Chohan pours the blessings of life into the nature kingdom. As you stand near the entrance of that great chamber you can see the White Flame of the Comfort Presence which has the appearance of a large and beautiful water lily. As the Flame reaches out to the periphery of the room, it becomes a delicate pink at the edges. In the center of that lily-flame stands the living pres-

ence of the Beloved Maha Chohan in the seamless white robe and beautiful white turban with the great emerald in the center. Around His body dances the tremendous light which is His natural aura, being the magnet for all the energy of the Earth.

The nature devas have created a canopy over the entire island of Ceylon, duplicating the same beautiful white lily, and that canopy of light is exquisite because they have created the flower with the cup facing downward, the stamen being pink, the flower itself having pink edges to match the large Flame Flower in the Temple. The entire island is held within that canopy and the fragrance of comfort and peace emanating from it is magnificent.

From the center of the large Flame have been created seven similar flowers - one for each of the seven Chohans. In the center of the lesser flower each one of Us has focused the particular gifts of Our Rays - a cosmic pulsation of which will join with the mother Flame as it passes into the inner bodies of the students when the Trans-- mission of the Flame around the world begins.

The Beloved Maha Chohan now has turned His attention inward which makes the Flame in His Heart visible. This is expanding now until His form is no longer visible within it. As you look upon Him now, you can see the activity of magnetization in its greatest power as far as the Earth is concerned and from the Sun comes that tremendous concentrated river of force which is not automatic, but is invoked and magnetized by the spirit of the Maha Chohan. As that mighty river of force enters into the heart of the Flame, one has to recede because the entire room becomes a battery

of such magnificent concentrated light that is too powerful for those even while acting in the freedom of the etheric body. However as one looks into that river of force from a safe distance, it will be seen that it looks like a rainbow in the seven colors representing the Rays. As these rainbow currents enter the heart of the Maha Chohan, they are deflected, one color going into the heart of each one of the seven lilies as well as the Chohan who represents that particular Ray. Now you get the picture of the great Cosmic currents flowing from the heart of the Sun, and how, as they enter the atmosphere of Earth they are diffused into the seven colors. The light is pure white until it enters the body of the Maha Chohan where it is transformed into the seven colors like a living rainbow.
